

Abrasive, Dirty, Slurry, High Temperature and Special Service Valves

VALVE SOLUTIONS FOR OIL & GAS, MINING AND PROCESS INDUSTRIES

• METAL TO METAL SEAT BALL & PLUG VALVES

Global Supply Line supply flanged, weld and screwed end severe and critical service valves manufactured by Starline, Sferova, Energy Valves and Australian Pipeline Valve.

Also available, true full bore top entry plug valves for slurry and dirty service.

• BUTTERFLY VALVES

100% Shut-off, true metal to metal seat butterfly as well as PTFE seat high performance, firesafe, PTFE lined and high pressure lined all ex-stock.

• DUPLEX, MONEL, ALLOY, STAINLESS VALVES

Ball, check, control, gate, globe & plug valves in all materials for low and high temperature.

• SPECIAL SERVICE ISOLATION & CONTROL VALVES

- Ball, check, control, diaphragm, gate, globe & parallel slide valves.
- Specialised slurry valves can be imported in a wide range of types.
- Ceramic valves and urea valves also available.
- Steam valves, geothermal slab and wedge gate valves.

• KNIFE GATE VALVES

Metal seat, PTFE seat, viton seat, EPDM seat. Also 'O' port available.

• CAM ACTION SEAT BUTTERFLY & BALL VALVES

Resilient and metal seated high performance butterfly and ball valves with cam action seat which lifts off ball/disc during opening and closing to avoid seat damage. The design also protects the seat from high velocity and abrasion damage during initial opening. Composite triple seats can also be supplied with nylon/teflon/metal.

We keep \$50 million inventory of valves in stock.

Metal Seated Ball Valves

STAR LINE[®]

CLASS V & VI SHUT OFF

The production of a zero maintenance, high performance metal seated valve has been the goal of many engineers. Starline are unique as their combination metal seat/viton seat offers true class VI shut off. The seamless design has been simulated by TUV Gas for 50 years service. Sand and many other particulates will not damage the unique bonded special formulation viton seat inset. Starline also manufacture a pure metal to metal seat for high temperature and more aggressive abrasive service.

For certain applications such as abrasive media or high temperature, soft seated ball valves are not suitable and the ultimate solution is to use a top quality metal seated valve but at a reasonable price. **100% ITALIAN MADE.**

Starline's range of METAL SEATED BALL VALVES provides a high performance, zero maintenance, high quality standard production ball valve with a competitive price and relatively short delivery time. The production of STARLINE METAL SEATED BALL VALVES has been divided in two different categories: HIGH TEMPERATURE and ABRASIVE SERVICE.

Starline has developed its standard production to obtain a contained cost ABRASIVE SERVICE metal seated ball valve, tested by simulating a 50 years life service in an abrasive environment with water containing river sand, welding rods and other abrasive particulates. The HIGH TEMPERATURE floating ball and trunnion mounted bi-directional metal seated valves has been developed by Starline for customers looking for a reliable valve at a competitive price.

Additional information on the full range of Starline floating & trunnion mounted metal seated ball valves, go to www.globalsupplyline.com.au/catalogue-starline.html
