AIR TORQUE®

The Air Torque "S" Series stainless steel actuators are a corrosion resistant rack and pinion actuator particularly engineered for corrosive environments or sanitary.

They are manufactured by using forged high quality stainless steel body material in A182 F316/ EN 10088/3 1.4401.

The Air Torque "S" Series stainless steel actuators are well suited for automating butterfly, ball, and plug valves in harsh, corrosive environments and they are available in both Double Acting and Spring Return versions.

The most typical fields of applications are:

- Chemical processing
- Pulp and paper
- Pharmaceutical
- Marine and offshore
- Food and beverage
- Sanitary
- Cosmetics

The stainless steel actuators "S" Series are also available in polished finishing particularly suitable for Pharmaceutical and Food industry where surface cleanness is requested.

- **One compact and unique design**

Compact and modern shape to avoid cavity and corrosive deposit build up. With identical body and end caps for double acting and spring return model to reduce inventory, it allows field conversion, by adding or removing modular spring cartridge.

- **Pistons design**

Dual piston rack and pinion design for compact construction, symmetric mounting position, high-cycle life and fast operation, reverse rotation can be accomplished in the field by simply inverting the pistons. Both pistons are anodized for a better corrosion and wearing resistance.

- **Two independent external travel stop adjustments**

As a standard, travel stops allowing adjustment for -5° up to $+5^\circ$ on the close position, and for $+5^\circ$ up to -5° on the open position. This allows accurate valve alignment.

- **Universal and anti-blowout drive shaft**

Integral drive-shaft is available with double square as standard to permit versatility, lower and more flexible inventory.

- **Position indication**

As standard actuators are supplied with a position indicators allowing visual actuator/valve position. Special types of position indicators suitable for direct mounting of sensors (P+F, IFM, etc.) and mechanical limit-switches available on request.

- **Multiple bearings and guide**

Bearings on piston and racks for precise operation, low friction, high cycle life with piston guides that prevent shaft blowout.

- **Modular preloaded spring**

Cartridge design in high grade coated steel for simple range versatility, greater safety and corrosion resistance.

- **Full compliance**

To specifications ISO 5211, DIN 3337 and VDI/VDE 3845 providing the product interchangeability and the easiest valve automation and accessories installation. (Namur air connections only for model SB AT054U to SB AT404).

- **Actuator Marking Traceability**

Each actuator is marked with detailed information regarding product description, connections and working conditions; furthermore each individual actuator is produced with a serial number for full traceability.

MAIN OPTIONS

1. Polished surface for Sanitary and Pharmaceutical applications.
2. Stainless steel pistons and springs.
3. 100% travel stop adjustment.
